

MANAGING PARTNERSHIP

(Course Reference No.: TGS-2021009438)

Duration:
2 Days

Overview

Service partnerships are crucial to the growth of businesses. Whatever your organisation is trying to sell a product, service or idea, it is important to have really strong service partners to better respond to changes in customer needs, desire and expectations.

It is not enough just to come together to offer products or services. Your partnership must be able to access to new customers. It must also add value to previous customers. Have the needs of your customers changed? Due to the current situation, have their desires and expectations been shifted?

Service partners provide products and services that are essential to the growth or efficiency of the business. They supplement your resources by providing products or expertise that your business does not have. What sort of relationship would you like to establish and maintain with them?

The challenge would be to collaborate with service partners to deliver and enhance the customer experience. This module provides the necessary knowledge and skills to develop strong relationships with service partners with a long-term view to enhance service delivery and excellence.

Outline

The course covers a range of topics which can **possibly include but is not limited to the following:**
